

Create a customer login in 1 minute

Two ways: with the Telegram bot (the fastest) or right in the panel.

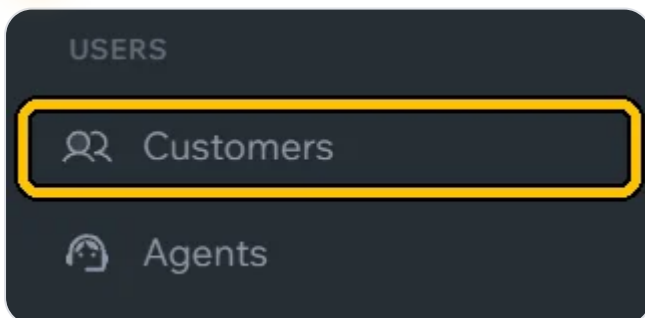

This page: <https://ajuda.solutionsapp.site/en/create-customer/>

Way 1 — With the Telegram bot (the fastest)

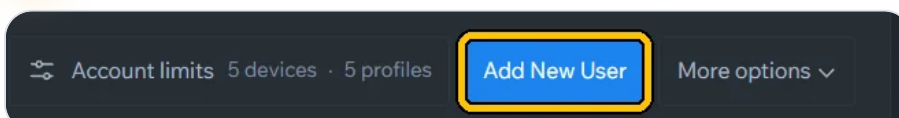

- 1 Open the [Telegram assistant](#) (the first time, connect the panel with the [API key](#)).
- 2 Send the **customer's name** and the **list link** and tap  **Create**.
- 3 Tap  **Copy message** and send it to the customer. Done: username, password, DNS 1 and DNS 2 and the tutorial link.

Way 2 — Right in the panel

- 1 In the menu, click **Customers**.

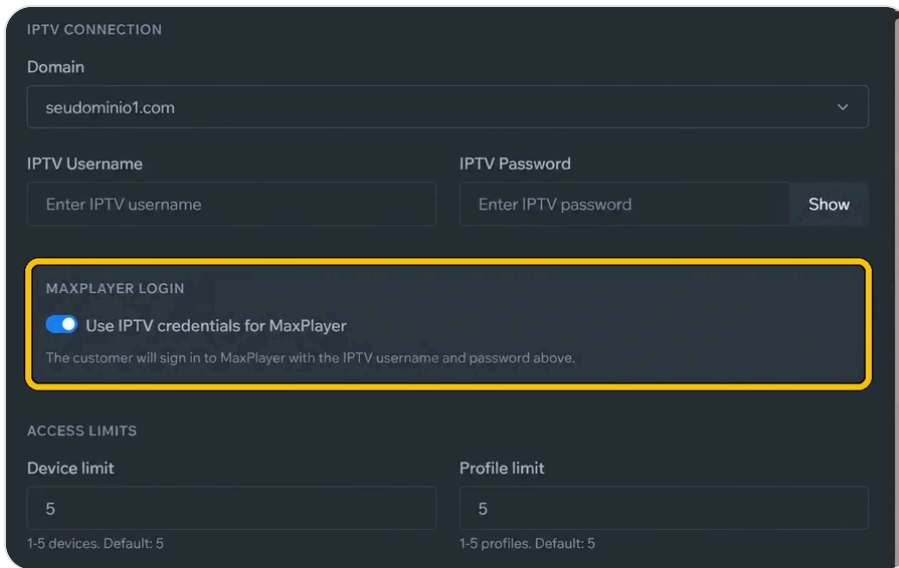

- 2 Click **Add New User**.

3

In **Domain**, choose the DNS. Type the customer's list **IPTV Username** and **IPTV Password**. Keep **Use IPTV credentials for MaxPlayer** on: the customer signs in to the app with that same username and password.

IPTV CONNECTION

Domain

seudominio1.com

IPTV Username

Enter IPTV username

IPTV Password

Enter IPTV password

Show

MAXPLAYER LOGIN

☒ Use IPTV credentials for MaxPlayer

The customer will sign in to MaxPlayer with the IPTV username and password above.

ACCESS LIMITS

Device limit

5

1-5 devices. Default: 5

Profile limit

5

1-5 profiles. Default: 5

4

In **Device limit** and **Profile limit**, set how many devices and profiles (1 to 5).

5

Click **Create User**. Then send the customer the [ready-made message](#) with the username, password and install link.
